St. Louis de Montfort Mission Statement

We are called to be and to become a loving family centered in Jesus.
We acknowledge and accept that each of us is unique and has special gifts from the Holy Spirit.
We wish to nurture, develop and share these gifts within and for the Body of Christ.
Having been called by Baptism into that Body, we celebrate our relationship in Word, Sacrament and Family Celebration.
We are then sent to call others to Christ through who we are and what we do.
We recognize Christ’s call to be one in Him and commit ourselves to his way of life.

Archbishop Gomez is asking all Catholics to contact their Assembly members and Senators and urge them to vote “NO” on Senate Bill 131. Simply tell your elected officials to vote “NO” because this legislation fails to protect all victims of childhood sexual abuse, discriminates against Catholic schools and other private employers, and puts the social services and educational work of the Church at risk. The Bishops of the California Catholic Conference believe it is urgent for all Catholics to act now.

BACKGROUND ON SB-131

1) Senate Bill 131, now before the California Legislature, would suspend for one year a deadline (called a “statute of limitations”) to give childhood sexual abuse victims the chance to sue their abusers’ employers for damages resulting from their abuse.

2) SB-131 is not good legislation because it does not protect all children. In fact, the bill only allows lawsuits to be filed by children who were abused in religious and other private schools and organizations such as the YMCA or Little League. Children who were abused by public school teachers or other public employees are specifically not protected by SB-131. That means this legislation offers no protection for the 92% of California’s children who attend public schools or for children in foster care or in other public settings.

3) SB-131 unfairly targets only Catholic-run and other private institutions because it only allows lawsuits against private schools and organizations and specifically exempts public schools and other public institutions. The sexual abuse of children is a social reality. It is not limited to private institutions. Any legislation that seeks to deal with this grave problem should be applied to protect victims in all institutions in society—public and private—equally.

4) SB-131 does nothing to increase penalties against the actual abusers of children. The bill allows for monetary damages to be imposed on private employers, but it does not impose any civil or criminal penalties on the perpetrator.

You may pick up a sample letter in the rectory that you are free to use to write to our Assemblyman Katcho Achadjian.

DID YOU KNOW?
Never leave your children in a hot car
Did you know that it only takes 10 minutes for a car to heat up by 19 degrees? Every so often we hear news stories of parents forgetting infants or leaving a sleeping toddler in the car, and tragedies that ensue. Never leave a child alone in a car, even for a minute. Degrees can be deceiving. Fatalities can occur at temperatures as low as the mid-50s because a vehicle heats up so quickly. Children are at a great risk for heat stroke because their bodies heat up three to five times faster than an adult's does. Cracking a window? Not a solution. Some advanced technologies are still being developed that may help prevent heat stroke deaths in vehicles, but nothing has been proven effective yet. SABÍA USTED?
Nunca deje a sus niños adentro de un automóvil caliente
Sabía que sólo toma 10 minutos para que un automóvil se caliente hasta 19 grados Fahrenheit. A menudo escuchamos noticias de padres de familia que olvidan a sus niños o los dejan durmiendo adentro del auto resultando en tragedia. Nunca deje a su hijo/a solo/a adentro del auto, ni siquiera por un minuto. La temperatura exterior puede ser engañosa. Las fatalidades pueden ocurrir a temperaturas tan bajas como los 50 grados Fahrenheit porque un vehículo se calienta rápidamente. Los niños corren gran riesgo de sufrir un ataque al corazón provocado por el calor extremo porque sus cuerpos se calientan tres a cinco veces más rápido que el cuerpo de un adulto. ¿Romper una ventana del auto? No es una solución. Se están desarrollando algunas tecnologías avanzadas que pueden ayudar a prevenir las muertes por ataques cardiacos provocados por calor, pero nada ha resultado efectivo hasta ahora.
